4. An experienced and influential event planner “Funtime” has been engaged and preliminary discussions have already begun regarding events

5. Successful discussions held with Sri Lanka Tourism Development Authority (SLTDA) and the Conventions Bureau in order to obtain national level support and partnership of government institutions

6. SLTDA pledged support to obtain the support and partnership from the national carrier Srilankan Airlines. A preliminary meeting has been scheduled for the first week of

7. Ideation of conference theme has begun

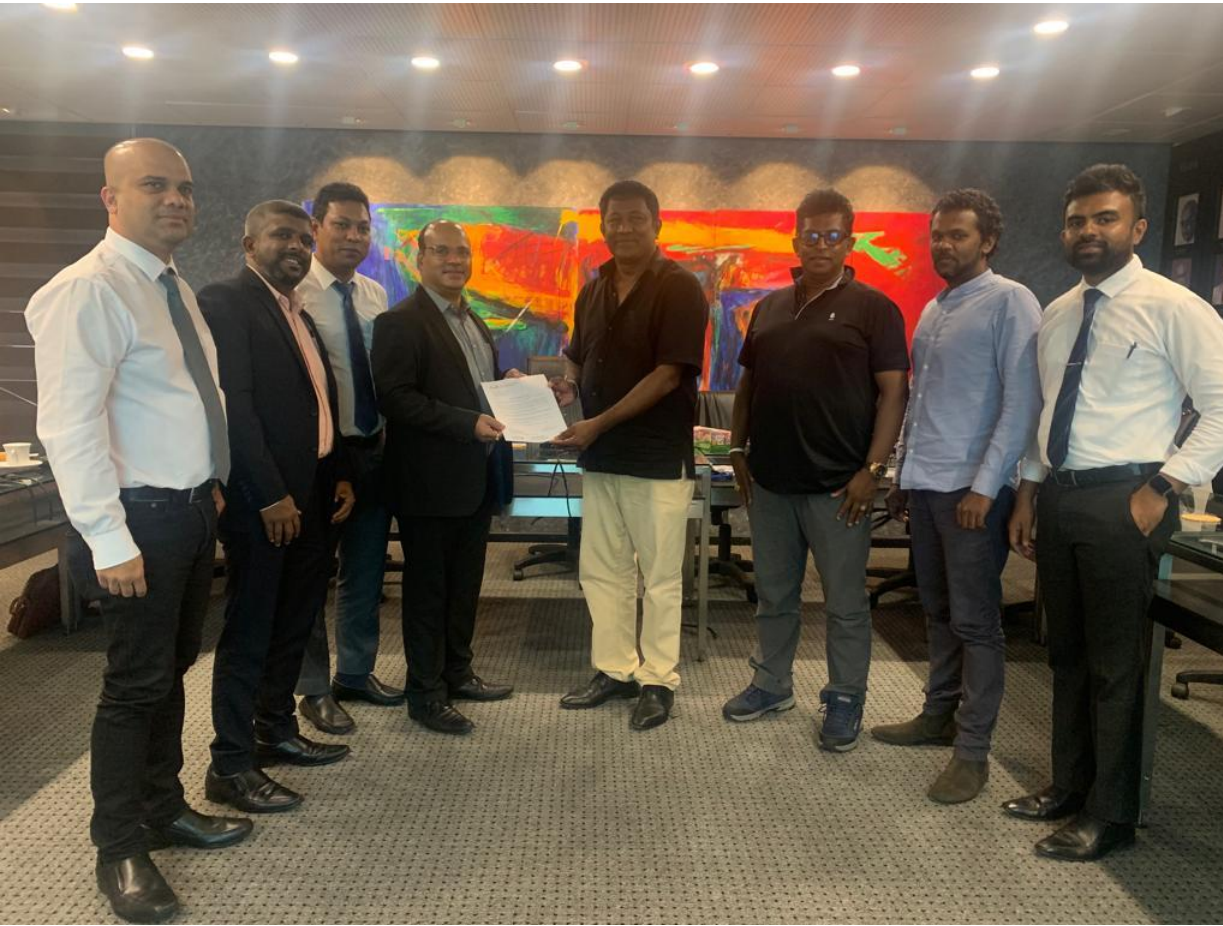

8. Preliminary work on organizing Architect Guided tours and the ARCASIA Sportsfiesta has also commenced

9. Formalities are being followed up on with regards to establishing a Dollar Account for this venture

The committee has held 4 meetings

Discussions have commenced with sponsors

Discussions have commenced with Aitkenspence Hotels regarding block reservation and hosting of events at Heritance Kandalama and value addition to the event provided by the event planning organization “Funtime”

Discussions have commenced with Sri Lanka Tourism Development Authority and the National Conventions Bureau

PARADIGM SYNERGY

TROPICAL MODERNISM EMBRACING AI ARCHITECTURE

Architecture is a dynamic field that constantly evolves, influenced by cultural shifts, technological advancements, and environmental considerations. One intriguing concept that carries immense potential for the future of architecture is the fusion of Tropical Modernism and Artificial Intelligence (AI). Tropical Modernism, characterized by its responsiveness to climate, culture, and context, aligns seamlessly with the capabilities of AI to create architectural masterpieces that not only embrace local environments but also push the boundaries of design innovation.

"Smart Ecosystems: Nurturing Sustainable Cities through the Fusion of AI Intelligence and Tropical Modernist Architecture"

"Harmony in Design: Exploring the Symbiosis of AI and Tropical Modernism Architecture for Sustainable Urban Futures"

History Of Advance Technology and Architecture Symbiosis

Sigiriya in Sri Lanka embodies a successful merger of technology and tropical architecture. The site showcases advanced hydraulic systems for water management, open designs for natural cooling in the tropical climate, and rock-carved structures that utilize the natural environment. Integration with the landscape, adaptation to monsoon patterns, and a harmonious blend of cultural and climatic considerations further emphasize the seamless symbiosis of technology and tropical architectural principles at Sigiriya. This historical site stands as a testament to the ingenuity of ancient architects in creating a sustainable and culturally rich environment.
