

VIET NAM ASSOCIATION OF ARCHITECTS COUNTRY REPORT

ARCASIA COUNCIL MEETING

06 Sept, 2022

BRIEF INTRODUCTION OF VIET NAM ASSOCIATION OF ARCHITECTS - VAA

- The Viet Nam Association of Architects (VAA) was established in 1948. It is a political - social and professional organization belonging to the system of literature and art associations in Viet Nam. VAA takes the important role of a social critical review body to government and management agencies and makes itself responsible for disseminating architectural knowledge, promoting and developing the profession of architecture nationwide.
- VAA has about 6500 members from 61 Chapters in provinces, cities and 28 Association's Branches in major agencies those are practicing planning, architecture, construction and education in the whole country and VAA's functional divisions.
- National Congress of VAA is held every term of 5 years. General meeting of the VAA's Executive Committee is held every year and the Standing Committee is twice per year.
- Viet Nam Architecture Day is April 27th

This is an important activity in the series of activities launched by Hanoi with the coordination of many art fields, including architecture in order to raise awareness and connect the community of creativity of the city, gradually realizing the construction of creative spaces and creative communities by the Innovation Week

Key issues facing the Architects/Architectural Profession in Viet Nam

- Key issues facing the Architects in Viet Nam: Problems of unfair competition, low design fees, high additional costs; practice procedures are more complicated.
- Key issues facing the Association: The effectiveness of the Association's programs on research and criticism. Ability to protect the architecture heritage of the past and present; Lack of sustainable funding for long-term development; The unsubstantial companionship of society with architectural issues.

FUTURE PLAN

- Promoting the Architectural Research Network to improve the quality of researching projects, architect training method and programs, carrying out of continuous training, strengthening the practicing skill of architects...
- Promoting the green and sustainable architecture in the relationship between modern architecture and traditional culture preservation, confronting challenges of globalization and climate change.
- Closely coordinate with authorities and provinces/cities in effective planning - architecture management and implementation of the Law on Architecture in the locality.
- Enhancement of architects' social responsibility in planning - architecture design, consultation as well as criticism for the central and local government in architecture, urban management and development.

FUTURE PLAN

- Implementation 5 projects on:
 1. Training, innovating and improving the quality of architect human resources towards international integration.
 2. Preserve and display the value of architectural identity of Vietnamese ethnic groups.
 3. Research, preserve and promote Vietnamese architecture.
 4. Rural architecture from traditional to modern, associated with the integration period.
 5. Building and developing a system of theory and criticism of Vietnamese architecture.

Thank you!
