(2nd Wave)

Formation of Assessment Tools for ACG 13 Guidelines

ACSR Committee Meeting
Proposed Meeting on Mar 16,
2021 by Zoom

ACSR Award Assessment
A Taskforce was formed to review
the assessment criteria and target
completion by March 2021

ACSR Roundtable Meeting
Proposed Meeting in between June
to September, 2021.
Theme of the RT to be discussed in
the Committee Meeting.

ARCASIA
Council
Meeting

ARCASIA Heritage Preservation Group (AHPG)
Target Formation in March, 2021

AHPG
Target Completion of Draft Guidelines for
Review in ARCASIA Council Meeting

Disaster Training Workshop in Zone C

ACSR AWARD

- Redefining of ACSR Award under ARCASIA Award. Identifying of criteria for recognizing and establishing Marking scheme for Jurors derived from UNSGD's.
 - AAA for Social Responsible Architecture (Category A)

Assessment Criteria Taskforce

- Led by Dr. Ar. Thana Chirapiwat
- Supported by members from Zone A, B & C
- SDG will be referred to establish the Assessment criteria
- Expect to complete the criteria by March 2021 for OB's review & match with the AAA Award Jury schedule

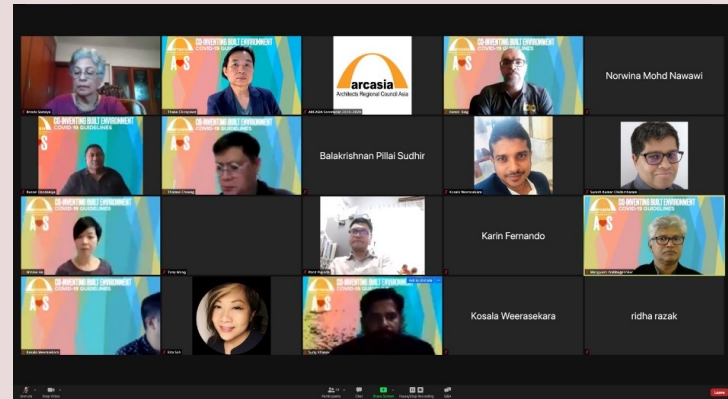

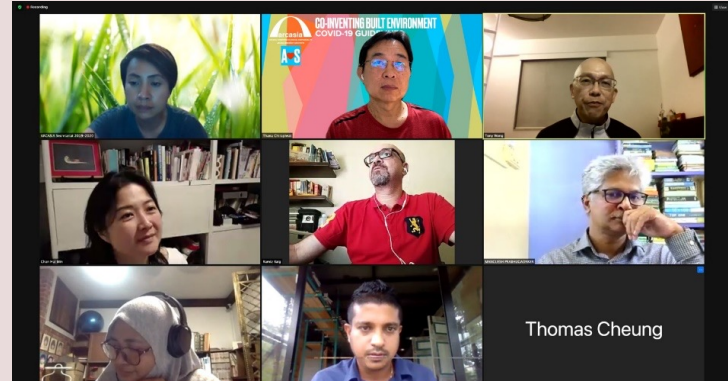

ACSR / AEA COVID 19 TASK FORCE

- Soon After Covid outbreak ACSR AEA jointly established Covid 19 Task force
- Serious and active meetings every Monday from last April to Date.
- Managed to conduct Online workshop with four key Speakers who are from the fields of Medical, Town planning, Public Administration and Architecture.
- Managed to conduct Webinar with same Speakers + Poverty alleviation expert.
- Managed to launch 13 ACG's Guidebook and Online Presentation Forums in Malaysia, Sri Lanka to promote and make awareness for the Guidelines.
- ACSR seeks all country support to propagate this endeavors.

Co-inventing Built Environment - ARCASIA COVID-19 Guidelines Public Webinar

Title - Co-Invent Built Environment – ARCASIA Guidelines for COVID-19

Objectives:

1. To announce the ARCASIA Guidelines for COVID-19.
2. To seek final comments on the Guidelines and
3. To seek alignment of the same.

Approach:

The Webinar is an event which formally launch the ARCASIA COVID-19 Guidelines.

THE PRODUCT

13 ACG's Booklet

Ar. Rita Soh Siow Lan
President, ARCSIA

2020 had been a challenging year for everyone. The COVID-19 Pandemic has swept across the world, disrupted daily lives, shuttered businesses and created hardships for many. Notwithstanding the chaos, our ARCSIA community comprising the Architectural Fraternity of 21 Asian countries have come together like never before. The outstanding support of our community is a testament to the strength of the ARCSIA spirit during this difficult time of crisis.

Despite restrictions on international travels and massive lockdowns in many places, I am pleased to announce that we have successfully pivoted our activities to online platforms and have continued to hold seminars, competitions and architectural awards in 2020. Especially poignant in this turbulent time is the swift response and work by our ACSR Committee, who has declared 2020 the year to support and empower architects and the communities they serve, to focus on an action-oriented program to achieve immediate, mid and long term results through the formulation of guidelines in response to dealing with the pandemic situation.

With extensive research, developed through a series of rigorous workshops and webinars, the ACSR committee together with AEA has distilled 13 ACGs. It is envisaged that this document is used as a reference manual for all stakeholders of the built environment to help navigate the new normal that will emerge from the impact of COVID-19 once this crisis is over.

Therefore, I hope that our Council and member institutions will actively promote and adopt the measures identified in the document as a good practice for our cause. In addition, ACSR Committee welcomes all feedback and suggestions in order to further refine this document where necessary.

I wish you all a blessed year ahead!

Ar. Russell Dandenya
Co-Chairman, ARCSIA Committee on Social Responsibility (ACSR)

One of the main objectives of ARCSIA is to provide a forum for member institutes, government agencies and allied professional organizations for the discussion of problems of common interest and seek solutions to these problems, which would contribute to the advancement of the profession and the development of Architecture relevant to the culture and aspirations of the Asian people. The 13 ACGs booklet embodies this objective, and provides a comprehensive and timely solution to the pandemic, which has gone on to affect all our lives.

The President and Council of ARCSIA identified 4 key thrust areas. These include; preparedness against emergencies or pandemic life after 2020 - a new normal, empowering our communities - a new future, a new mindset, were identified to be addressed during the pandemic.

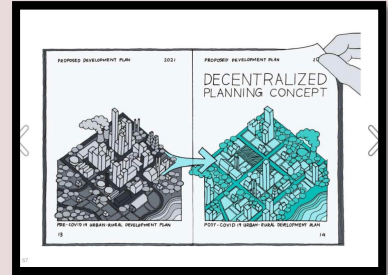

The ARCSIA Committee on Social Responsibility launched a research-based initiative to formulate guidelines conducive of creating a resilient and robust built environment for the future. The ARCSIA COVID-19 task force took it upon themselves to ensure that these guidelines could be simply adopted as short, mid and long term guidelines, and could be adjusted according to the economies, scales, culture, people, built environment of each country.

I am delighted with the outcome of collective wisdom and responsibility shared by all who participated in this mammoth task. I consider ACSR and AEA to have done a great service to the region and commend the efforts of all who contributed. Through the adoption of the 13 ACGs, it is hoped that sustainable solutions for the built environment of the future are achieved on a regional scale.

10 CITY PLANNING AND URBAN DESIGN REVIEW

Review the planning of urban and rural environments in light of identified new needs to counter COVID-19 and other future pandemics.

THE PRODUCT

13 ACG's Booklet

Introduction

by **Thana Chirapiwat, Ph. D.**
Webinar and Workshop Convenor
Editorial Board

Back in May 2020, when the COVID-19 pandemic caused cities and countries to go into lock-down, work-from-home and study-from-home became the norm for a large group of the urban population. Inversely the underprivileged groups of the population suffered immensely, as work-from-home and study-from-home were options which were far from viable for them. They faced a dilemma of either going out to work or to stay at home and be jobless, with no means of income.

ACSR (ARCSIA Committee on Social Responsibility) and AEA (ARCSIA Emergency Architects) members representing the 21 member countries of ARCSIA raised their concerns about the multitude of difficulties encountered throughout the region. To understand the early impact and reactions to the pandemic, a survey was set out in early May.

The survey brought to light that architects are already involved in the fight against COVID-19, by engaging in immediate relief works related to the construction of facilities and preparing guidelines. It was also reassuring to discover that architects were engaged in so many initiatives spread out over many fronts ranging from immediate and long-term relief work, campaigns and services, and even providing financial assistance to communities.

The key results from the survey showed that architects were not concerned only about themselves, it showed how they worked and survived during the crisis, and how architects proved themselves to be conscientious members of the community who played a vital role in the fight against the pandemic.

Tony S.F. Wong
Co-Convenor,
Director, ARCSIA Emergency Architects (AEA)

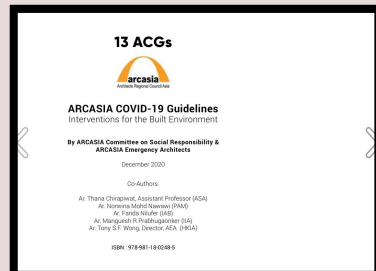

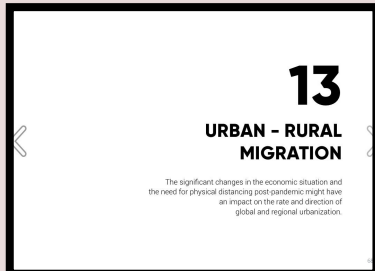

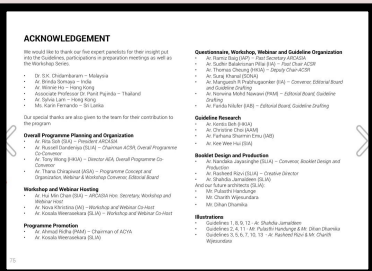

A set of guidelines that goes beyond architecture!

What can architects do about COVID19? While we are confident that we will eventually manage the situation, there is still a long way to go before we reach that point, and the significant damage and loss of life it caused deserves deep thoughts on how to manage it in the short term, and how to prepare ourselves for the next pandemic in the long term. Hence, we decided to develop a set of guidelines for architects.

It is obvious that architects alone cannot solve it, and even more so, for us to be effectively contributing to the solution, we need to understand more about the fundamentals of the pandemic, and what really matters, regardless of whether it is related to architecture or not. The guidelines need to go beyond architecture; and not only that, it needs to go beyond architects and building professionals. It needs to reach the policy-makers who have the power to change the rules, and the general public so that they can use the new environment effectively.

The 13 ACGs are comprehensive – in addition to what needs to be done to physical architecture, it goes on to cover urban design, city planning, operations and also looks at the socio-cultural aspects of life. It highlights key areas of focus and provides directional advice on how to solve the problem. However, due to the vast diversity in geography, the details need to be developed by a specific country to suit their unique circumstances, and an implementation plan should be adhered to promote it to Policy-Makers and the General Public.

While much has been done to develop the 13 ACGs, the daunting task of implementation is ahead. As such, I would like to take this opportunity to thank the team of architects and our guest experts from various countries, among our member institutes. Their voluntary contribution of time and effort has made this publication of collective wisdom a success. I look forward to having more architects joining our ranks in realizing the established guidelines.

FORMULATION OF THE CRITERIA ARCASIA AWARDS FOR SOCIALLY RESPONSIBLE ARCHITECTURE DR. THANA'S COMPREHENSIVE MATRIX

The screenshot shows a Zoom meeting with six participants: Rita Soh, Thana Chirapi..., Pei Ing Tan, Russell Dandeniya, Tony Wong, and Dong Hee Oh. The main content is a presentation slide titled "CRITERIA" with a heart icon. The slide lists the following criteria:

- Accessibility & Users
 - For All to use
 - Accessible for All
 - Cares for vulnerable/underprivileged groups
- Impacts
 - Impacts on natural resources – land, water, air
 - Social and ethical impacts – equity & equality, justice, values
 - Economic impacts
 - Urban ecology and infrastructural systems impacts
 - Policy and legislative impacts
- Design & Construction
 - Cost effectiveness
 - Resource efficiency
 - Aesthetic and cultural features
 - Participatory designing and building processes
 - Accessibility
 - Material choices
 - Building systems, equipment
 - Construction techniques
 - Quality of place/space – comfort & ease of use

THE INAUGURAL MEETING ARCASIA HERITAGE PRESERVATION GROUP

The graphic features a background image of a large, ancient stone dome structure, possibly a tomb or observatory, set against a hazy, mountainous landscape. The Arcasia logo is positioned in the top left corner. The text 'ACSR-AHPG' is written in a large, white, hand-drawn font, with 'ARCASIA HERITAGE PRESERVATION GROUP' in a smaller, brown, sans-serif font below it. The invitation text is centered in the lower half. At the bottom, there are three blue buttons: a Zoom logo, a 'CLICK HERE TO REGISTER' button with a right-pointing arrow, and a button with the meeting ID and passcode. A QR code is located in the bottom right corner.
