

OB meeting at KL 18 January 2013

ACPP

Committee on professional practice

PROGRAM for 2013-2014

1. Implementation of the format of the Country Reports by collecting data and making it available in the net. It should be uploaded directly by the member institute like UIA PPC.

Membership
Registration
Fees
Publication and Doc
Manpower
Education/ School
Legal framework of Practice

The past few ACPP committees have worked on the above mentioned points. Now the data is prepared. This should be closed by compiling and updating the info in the **Data Chart**.

2. Prepare a guideline for Do & Donts to avoid the Hazards of Professional Practice for the region. In most of the developed world the practice is protected by many means, like Insurance policies. But in our region this is not effective. So this guideline will help architects of arcasia to practice in a safer ground. It may start and may end up as **'A Practice hand BOOK'**
3. CPD Is a key issue through with the practice in our region can develop more. Architectural design is now becoming more multilevel, complex service oriented, thus CPD is very much relevant to the present day/ future Practice. It is realistic to promote an Asian space in terms of CPD similar to the one promoted in Europe. how do we imagine the future? ARCASIA may develop a common CPD quality Guidelines with a common objective, the development of a Appropriate **ASIAN brand for CPD**.
4. Cross border internship, Mobility of Architects and Practice in a Host Country. Collaborations and Partnerships, **MRA's**

In Implementing these we will consult and study the UIA guideline so that it becomes harmonious with the global standards but at the same time we keep our asian values.
