PRESIDENT'S MOTTO

“Sowing SEEDS for the Future”

Social awareness & responsibility

Education & life long learning

Environmental sustainability

Design excellence & expertise

Stewardship in the use of all resources

ACSR PROGRAM OF ACTION – “DESIGN FOR RESILIENCY”

Focusing on Climate Change...

Social awareness & responsibility - Climate change awareness

Create awareness among the people regarding the climate change related trends and strategies.

Encourage changes in their attitudes & behavior and help them adapt to climate change.

Education & Life long learning

Education is an essential element of the global response to **climate change**.

It helps people understand and address the impact of global warming, increases “**climate literacy**” among young people.

It helps learners to understand the causes and consequences of climate change, prepare them to overcome from the impacts of climate change and empower learners to take appropriate actions to adopt more sustainable lifestyles & possible alternative patterns of built environment of the region.

Environmental Sustainability

Reducing the impact on the environment and adopting practices that use natural resources sustainably.

Architectural Proposals & Interventions which address the disasters associated with climate change to be environmentally friendly and sustainable.

ACSR PROGRAM OF ACTION – “DESIGN FOR RESILIENCY”

Design excellence & expertise

Proper awarding scheme to be implemented to appreciate & admire the exemplary work done by members of ARCASIA and the students to overcome from a particular disaster associated with climate change.

Awarded designs can be practically use to address the particular disasters in the region.

Member countries can conduct their own awards to encourage the members and students to provide disaster resilient Architecture to the region.

Stewardship in the use of all resources

Ethical and efficient **use** of common **resources** in the region.

Platform can be created to share the resources whenever needed - Prototypes and universal design solutions

ACSR ACTION PLAN

Suggested Action plans as per the Islamabad & Colombo resolutions

1. 2 years (medium term)
2. 4 years (long term) plans

4 Thrust Areas

- Disaster management
- Universal design code
- Affordable social housing
- Conservation techniques

ACSR ACTION PLAN

1. POLICY AND ACTION on managing disasters associated with climate change:

Prediction by The Inter-governmental panel on climate change :

Asian population likely to get affected due to effects of climate change could be as much as 400 million.

Meaningful intervention **to prevent, mitigate or alleviate the anticipated situations.**

- The ACSR will initially prepare a policy paper based on the findings of the research units of the each ARCASIA Institutions
- Seek for ideas/proposals within ARCASIA countries; this could be via competitions, workshops, etc.
- Pilot projects could be implemented thereafter. Each & every ARCASIA Institutes to follow at least one project.

Timeline: Policy paper - 6 months

Ideas/proposals - 6 months

Planning pilot project - 6 months

Implementing pilot project - 6 months

Review and way forward to follow.

ACSR ACTION PLAN

2. CONSERVATION

ARCASIA countries to have their own Charters with ICOMAS. (SLIA to join ICOMAS and form a Charter).

Preserving of Asian heritage,
CSR projects like formulating guide books,
Adaptive re-use of buildings and
Awareness of Asian heritage etc.

3. EDUCATION

Get Architecture into the school curricular and guide students to observe situations in design point of view
Include architects' role in conservation and climate issues

4. DISASTER ASSISTANCE

Immediate action by emergency architects and CSR projects will be followed by each member country to bridge and coordinate NGOs and Govt. to formulate post disaster CSR work through CSR committees as short-term projects & also need to be shared within ARCASIA as experience of each country & publish such instances to make awareness.

5. AFFORDABLE SOCIAL HOUSING

The issue needs to be tackled on the basis of several strategies: sustainable low-cost technologies, subsidies in the form of trade-offs (e.g. in certain localities, to allocate a ratio in all public housing schemes for affordable social housing), tackling urban sprawl, design for high density housing, concept of “**Resilient City**” etc.
Make cities viable for all not according to the income level.

ACSR ACTION PLAN
