November 2018
Revised 11th Malaysia Plan combats climate change
3 STRATEGIES

1. Intensifying climate change mitigation
2. Augmenting climate change adaptation
3. Strengthening disaster risk management.

Revised 11th Malaysia Plan combats climate change
Ar Mustapha Kamal Zulkarnain

Graduate from Auckland University, New Zealand
Practicing: 27 years
Organization: PAM
Area of expertise: Urban Resilience since 2004
Talks:
- RIBA Conference in London entitled Designing City Resilience 2015
- Urban Renewal in Singapore 2015, 2016, 2017
Panel:
- Urban Thinkers Campus (UTC) under the UN Habitat.
Convener of the PAM Roundtable Discussion with Archinesia and the members of the publications communities during the 2016 Kuala Lumpur Architectural Festival (KLAF).
Committee for KL Low Carbon Society Blueprint, KL Competitive City and C40 Group in Kuala Lumpur City Hall (DBKL).
Lecturer at Centre of Studies for Architecture (CoSA), UiTM Puncak Alam.
Student advisor to the Architecture Students Association (Archisa).
Graduate: LAM Part I and II from University Teknologi MARA (UiTM) before practicing as a Graduate Architect.
Participated in disaster recovery and marginalized community programs with Mercy Malaysia and UPM while teaching part time in UiTM, where she discovered a newfound passion in education.

Kartini Kasmuri

Graduate: Universiti Putra Malaysia in Landscape Architecture
Practicing: 3 years as horticulturist with a local developer maintaining and managing indoor and outdoor landscape.
Practicing: landscape consultancy. Her works involve working with the plants and elementals kingdom to uplift a given space, thus invoking the self-healing ability within the given space.
Focus:
- Plants as food medicine to promote individuals’ well-being physically and spiritually.
- Apart from providing consultation and education in relation to sustainable farming practices, she is also assisting in managing Kebun-kebun Bangsar located right in the middle of Bangsar city centre.

Architectural Tour Guide Training 2.0
2019

By OXCEL Award Winning Certified Architectural Heritage Tour Guide: Ar. Ahmad Najib bin Ariffin
Nusantara Academy of Development, Geocultures and Ethnolinguistics (NADGE)

Malaysia needs to have a core of good Architect Guides who can do professional architectural tour guiding, as is done in developed countries. We have very few, among them Ar. Ahmad Najib Ariffin who won the prestigious OXCEL Award for World’s Best Heritage Tourism Guide in 2007. PAM Heritage and Conservation Committee would like to tap on his expertise to train our interested members who may like to be freelance Architect Guides out of passion and sharing our Malaysian architecture and the heritage of our built environment with the public and foreign visitors.

PAM Student Award to recognise outstanding young Malaysian Architectural Graduates

Last update: 12/01/2019

KUALA LUMPUR, Jan 11 (Bernama) — The Pertubuhan Akitek Malaysia (PAM) today launched the PAM Student Award 2019 to recognise and reward outstanding Malaysian talents amongst the upcoming batch of architectural graduates.

PAM in a statement said the award, which aimed at promoting innovation, merit and excellence among the youth in the field of architecture, is open to all Malaysians who graduated last year.

“There will be two categories of the award, namely the PAM Silver Medal for Master and Bachelor of Architecture graduates, while the PAM Bronze Medal for Bachelor of Science of Architecture graduates or its equivalent.

“The award winners will be selected through a rigorous two-stage selection process of their architectural portfolios with interviews by a panel of experts,” the statement said.

Submissions for the PAM Student Award will be open from Jan 10 onwards and the closing date for Stage One submissions will be on March 8.

The presentation ceremony will take place in June 2019, the statement said.

The PAM Student Award was introduced in 2012 and is the highest accolade for Malaysian architectural graduates and students by the national organisation for architects.

Malaysia to strengthen women’s role in disaster risk management, says DPM

Deputy Prime Minister Datuk Seri Dr Wan Azizah Wan Ismail who is also Minister-in-Charge for Disaster Management, said Malaysia’s approach to disaster risk reduction (DRR) is guided by the belief that women’s roles are crucial in making the community more resilient and better prepared for a continuously changing disaster landscape.

1. Recognizing that “stash, not burn, to earn additional income” as a fresh approach to solving haze problem
2. Noting that the proposed conversion of biomass to energy would be viable
3. Recognizing that water management is critical in peat areas
4. Recognizing that not at all times transboundary haze could be effectively controlled
5. Acknowledging that El Nino does significantly influence the severity of haze, and that it is now possible to predict any El Nino event six months ahead of time since well-established forecasting systems are already in place
6. Noting that there are still gaps in knowledge
7. How can current scientific knowledge be synthesized and translated into policy-relevant information to aid policy and decision-making management and to suggest further research?
8. Realizing that peatland issues are highly complex and that knowledge on these issues have thus far been mostly tailored for the scientific community, it is imperative to establish a systematic effort to reframe and communicate these issues to the public using common and accessible language

Icons are aspirations manifested. Beacons of materialized hope, they are the signposts to guide our endeavors towards better cities and urban living. From Seoul’s aspirations and transformation of dream future cities to Georgetown’s celebration of history, culture and conservation. From Singapore’s realization of a national identity to our own dreams for a New Malaysia.

Distinctive ideals and aspirations have moved societies and shaped these cities.
Syarat-Syarat Penyertaan:

1. Terbuka kepada semua penduduk di Blok 100 & 102
2. Pertandingan mengikut setiap tingkat
3. Lukisan mural untuk kawasan lobi
