CONSERVING ASIAN NATURAL AND BUILD HERITAGE

INCREASING ADOPTION OF TECHNOLOGY TO EMPOWER ARCHITECTS

FOCUSING ON SUSTAINABLE PRACTICE AND CROSS BORDER COLLABORATIONS ACROSS NATIONS
FORMATION OF
ARCASIA HERITAGE PRESERVATION GROUP

ACSR-AHPG
ARCASIA HERITAGE PRESERVATION GROUP

You are invited to join the Inaugural Zoom meeting
Oct 2, 2021 01:00 PM Singapore

ACSR-ARCASIA COMMITTEE ON SOCIAL RESPONSIBILITY
Inaugural meeting of the AHPG
Online meeting – 02.10.2021

Welcome to the ARCASIA Heritage Preservation Group

23 countries together
Can we transform the built heritage for a purpose?

An ambitious goal for ARCASIA member institutes

Formation of strategies to preserve ARCASIA Tangible & Intangible Heritage through AHPG...
Is the continuing mission from this tenure to the next...

Let’s discuss and deliberate with next leadership...Deputy Chairman Thomas Cheung and Farahna Shamin Emu... the way forward

Build less save more
Are we harnessing our built heritage adequately?

The responsibility of Asian Architects
FUTURE- HERITAGE GUIDE BOOK
for 100 Arcasia Heritage Preservation Guide lines

ACSG ARCASIA COVID-19 Guidelines

Introduction by Thana Chirakwat, Ph. D.

Tony S.Y. Wong
Director, ARCASIA Emergency Architects

What can architects do about COVID-19? While we are confident that we will eventually manage the situation, there is still a long way to go before we reach that point, and the immediate challenge is to deal with the current pandemic first. Architects need to be aware of these challenges and take appropriate actions.

The survey brought to light that architects are already involved in the fight against COVID-19 by engaging with the community to ensure the availability of facilities and preparing guidelines. It was also reassuring to see that architects were engaged in many initiatives to support the healthcare system, including designing and planning hospitals, and even providing financial assistance.

The survey also revealed that architects were not documented only for their designs. It showed that they worked and survived during the crisis, and how architects contributed. Information to be incorporated into the guidelines, including best practices during the pandemic.

The survey results from the survey showed that architects were not documented only for their designs. It showed that they worked and survived during the crisis, and how architects contributed. Information to be incorporated into the guidelines, including best practices during the pandemic.

10 CITY PLANNING AND URBAN DESIGN REVIEW

13 URBAN – RURAL MIGRATION

Arcasia COVID-19 Guidelines

This is a set of guidelines that goes beyond architecture.

What can architects do about COVID-19? While we are confident that we will eventually manage the situation, there is still a long way to go before we reach that point, and the immediate challenge is to deal with the current pandemic first. Architects need to be aware of these challenges and take appropriate actions.

The survey brought to light that architects are already involved in the fight against COVID-19 by engaging with the community to ensure the availability of facilities and preparing guidelines. It was also reassuring to see that architects were engaged in many initiatives to support the healthcare system, including designing and planning hospitals, and even providing financial assistance.

The survey results from the survey showed that architects were not documented only for their designs. It showed that they worked and survived during the crisis, and how architects contributed. Information to be incorporated into the guidelines, including best practices during the pandemic.

The 13 ACGs are comprehensive – in addition to what needs to be done to physical architecture, it goes on to cover urban design, city planning, and so on. It was an interesting study of how the pandemic influenced architectural designs and how architects responded.

More has been done to develop the 13 ACGs. No longer is architecture just about building something. Architects need to consider the impact of their work on society and the environment. The 13 ACGs aim to go beyond traditional architecture and include considerations such as sustainability, public health, and social responsibility.

The ACGs are a valuable resource for architects and designers looking to create buildings that not only meet the needs of their clients but also contribute to a better, more sustainable future.
ACSR AWARD

- Redefining of ACSR Award under ARCASIA Award. Identifying of criteria for recognizing and establishing Marking scheme for Jurors derived from UNSGD’s.
  - AAA for Social Responsible Architecture (Category A)

Assessment Criteria Taskforce

- Led by Dr. Ar. Thana Chirapiwat
- Supported by members from Zone A, B & C
- SDG will be referred to establish the Assessment criteria
- Managed to complete the criteria by March 2021 for OB’s review & match with the AAA Award Jury schedule
