JOINT COMMITTEE OVERVIEW

CONSERVING ASIAN NATURAL AND BUILD HERITAGE

INCREASING ADOPTION OF TECHNOLOGY TO EMPOWER ARCHITECTS

FOCUSING ON SUSTAINABLE PRACTICE AND
CROSS BORDER COLLABORATIONS ACROSS NATIONS

FORMATION OF ARCASIA HERITAGE PRESERVATION GROUP

The graphic features a background image of a large, ancient stone dome structure, possibly a tomb or observatory, set against a hazy, mountainous landscape. In the top left corner, the Arcasia logo is displayed, consisting of an orange arch above the word "arcasia" in black, with "Architects Regional Council Asia" in smaller text below. The central text reads "ACSR-AHPG" in a large, white, hand-drawn font, followed by "ARCASIA HERITAGE PRESERVATION GROUP" in a bold, brown, sans-serif font. Below this, an invitation message states: "You are invited to join the Inaugural Zoom meeting Oct 2, 2021 01:00 PM Singapore". At the bottom left, there is a Zoom logo and a blue button with a white arrow icon and the text "CLICK HERE TO REGISTER". To the right of this button is another blue button containing the text "Meeting ID: 856 2327 8601" and "Passcode: 12345". On the bottom right, a QR code is provided for quick access to the meeting.

Co-inventing Built Environment - ARCSIA COVID-19 Guidelines Public Webinar

Title - Co-Invent Built Environment – ARCSIA Guidelines for COVID-19

Objectives:

- To announce the ARCSIA Guidelines for COVID-19.
- To seek final comments on the Guidelines and
- To seek alignment of the same.

Approach:

The Webinar is an event which formally launch the ARCSIA COVID-19 Guidelines.

Register for the public webinar now: [CLICK HERE TO REGISTER](#)

50 ARCSIA CELEBRATING 50 YEARS 1969 - 2019

Ar. Rita Soh Siow Lan
President, ARCASIA

2020 had been a challenging year for everyone. The COVID-19 Pandemic has swept across the world, disrupted daily lives, shuttered businesses and created hardships for many. Notwithstanding the chaos, our ARCASIA community comprising the Architectural fraternity of 21 Asian countries have come together like never before. The outstanding support of our community is a testament to the strength of the ARCASIA spirit during this difficult time of crisis.

Despite restrictions on international travels and massive lockdowns in many places, I am pleased to announce that we have successfully pivoted our activities to online platforms and have continued to hold seminars, competitions and architectural awards in 2020. Especially program in this turbulent time is the swift response and work by our ACSR Committee, who has declared 2020 the year to support and empower architects and the communities they serve, to focus on an action-oriented program to achieve immediate, mid and long term results through the formulation of guidelines in response to dealing with the pandemic situation.

With extensive research, developed through a series of rigorous workshops and webinars, the ACSR committee together with AEA has distilled 13 ACGs. It is envisaged that this document is used as a reference manual for all stakeholders of the built environment to help navigate the new normal that will emerge from the impact of COVID-19 once this crisis is over.

Therefore, I hope that our Council and member institutions will actively promote and adopt the measures identified in the document as a good practice for our cause. In addition, ACSR Committee welcomes all feedback and suggestions in order to further refine this document where necessary.

I wish you all a blessed year ahead!

Ar. Russell Dandenya
Chairman, ARCASIA Committee on Social Responsibility (ACSR)

One of the main objectives of ARCASIA is to provide a forum for member institutes, government agencies and allied professional organizations for the discussion of problems of common interest and seek solutions to these problems, which would contribute to the advancement of the profession and the development of Architecture report to the culture and aspirations of the Asian people. The 13 ACGs booklet embodies this objective, and provides a comprehensive and timely solution to the pandemic which has gone on to affect all our lives.

The President and Council of ARCASIA identified 4 key thrust areas. These include: preparedness against emergencies or pandemic; life after 2020 - a new normal; empowering our communities - a new future; a new mindset, were identified to be addressed during the pandemic.

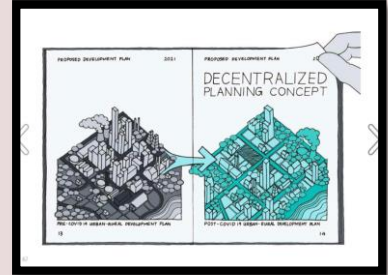

The ARCASIA Committee on Social Responsibility launched a research-based initiative to formulate guidelines conducive of creating a resilient and robust built environment for the future. The ARCASIA COVID-19 task force took it upon themselves to ensure that these guidelines could be simply adopted as short, mid and long term guidelines, and could be adjusted according to the economies, scales, culture, people, built environment of each country.

I am delighted with the outcome of collective wisdom and responsibility shared by all who participated in this mammoth task. I consider ACSR and AEA to have done a great service to the region and commend the efforts of all who contributed. Through the adoption of the 13 ACGs, it is hoped that sustainable solutions for the built environment of the future are achieved on a regional scale.

10 CITY PLANNING AND URBAN DESIGN REVIEW

Review the planning of urban and rural environments in light of identified new needs to counter COVID-19 and other future pandemics.

THE PRODUCT

13 ACG's Booklet

Introduction

by **Thana Chirapivat, Ph. D.**
 Webinar and Workshop Convener
 Editorial Board

Back in May 2020, when the COVID-19 pandemic caused cities and countries to go into lock-down, work-from-home and study-from-home became the norm for a large group of the urban population. Inevitably the underprivileged groups of the population suffered immensely, as work-from-home and study-from-home were options which were far from viable for them. They faced a dilemma of either going out to work or to stay at home and be jobless, with no means of income.

ACSP (ARCSIA Committee on Social Responsibility) and ARCSIA (ARCSIA Emergency Architects) members representing the 21 member countries of ARCSIA raised their concerns about the multitude of difficulties encountered throughout the region. To understand the early impact and reactions to the pandemic, a survey was set out in early May.

The survey brought to light that architects are already involved in the fight against COVID-19, by engaging in immediate relief works related to the construction of facilities and preparing guidelines. It was also reassuring to discover that architects were engaged in so many initiatives spread out over many fronts ranging from immediate and long-term relief work campaigns and services, and even providing financial assistance to communities.

The key results from the survey showed that architects were not concerned only about themselves; it showed how they existed and survived during the crisis, and how architects proved themselves to be conscientious members of the community who played a vital role in the fight against the pandemic.

Tony S.F. Wong
 Co-Convener

Director, ARCSIA Emergency Architects (SEA)

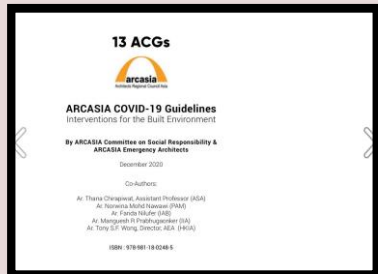

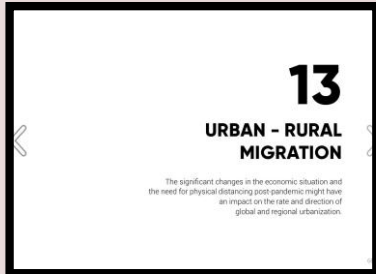

It is of guidelines that goes beyond architecture

What can architects do about COVID-19? While we are confident that we will eventually manage the situation, there is still a long way to go before we reach that point, and the significant damage and loss of life it caused deserves deep thoughts on how to manage it in the short term, and how to prepare ourselves for the next pandemic in the long term. Hence, we decided to develop a set of guidelines for architects.

It is obvious that architects alone cannot solve it, and even more so, for us to be effectively contributing to the solution, we need to understand more about the fundamentals of the pandemic, and what really matters, regardless of whether it is related to architecture or not. The guidelines need to go beyond architecture; and not only that, it needs to go beyond architects and building professionals. It needs to reach the policy-makers who have the power to change firm rules, and the general public so that they can use the new environment effectively.

The 13 ACGs are comprehensive – in addition to what needs to be done to physical architecture, it goes on to cover urban design, city planning, operations and also looks at the socio-cultural aspects of life. It highlights key areas of focus and provides directional advice on how to solve the problem. However, due to the vast diversity in geography, the details need to be developed by a specific country to suit their unique circumstances, and an implementation plan should be adhered to promote it to Policy-makers and the General Public.

While much has been done to develop the 13 ACGs, the daunting task of implementation is ahead. As such, I would like to take this opportunity to thank the team of architects and our guest experts from various countries, among our member institutes. Their voluntary contribution of time and effort has made this publication of collective wisdom a success. I look forward to having more architects joining our ranks in realizing the established guidelines.

ACSR AWARD

- Redefining of ACSR Award under ARCASIA Award. Identifying of criteria for recognizing and establishing Marking scheme for Jurors derived from UNSGD's.
 - AAA for Social Responsible Architecture (Category A)

Assessment Criteria Taskforce

- Led by Dr. Ar. Thana Chirapiwat
- Supported by members from Zone A, B & C
- SDG will be referred to establish the Assessment criteria
- Managed to complete the criteria by March 2021 for OB's review & match with the AAA Award Jury schedule

Proposal 4: Identify trans-boundary nomination for World heritage listing

- Share experiences and knowledge related to heritage conservation through webinar, colloquium.
 - Capacity Building in ARCASIA-countries through organizing workshop, training etc. on technical issues related to heritage conservation.
 - Another focus or notion of the AHPG group will be to collaborate (work together) with UNESCO, ICOMOS, ICCROM, DOCCOMMO, MANNASIA and the other international organizations in the heritage sector.
- Create and Promote Asian Identity
